

# Blower Packages

Appcon sizes, designs, and builds robust state-of-the-art blower packages for a wide variety of applications including pneumatic conveying, tank agitation, hopper fluidization, and more.

## PD Blower Packages:

- Packages utilizing top manufacturer blowers and motors
- 16" HG vacuum and 15 PSI pressure PD blower package operational range
- Robust steel bases to allow for easy maintenance and inspection, variety of paint options
- Ventilated drive guards
- Chambered inlet/outlet silencers, with or without absorption material
- Weighted pressure/vacuum relief valves
- Check valves
- Optional pressure/vacuum transmitters with analog output
- Intake air filters

## Blower Skid Systems:

- Skid mounted systems complete with after coolers and/or HEPA post blower filters
- Air-to-air or liquid media cooled after cooler configurations
- HEPA filters mounted in stainless steel housings with USDA sanitary finish for Dairy applications
- Wide variety of instrumentation available
- Temperature gauges/transmitters
- Air velocity gauges/transmitters
- Differential pressure gauges/transmitters
- Oversized doors on HEPA filter housings for easy cleaning and maintenance access

## Other Solutions:

- Wide variety of high vacuum pumps from top manufacturers for dense phase systems
- Hook and claw style pumps
- Oil filled rotary vane vacuum pumps
- Economical regenerative blowers
